

FREENOW Internal Policy: UK Driver Retention & Recovery Guidelines

Section A: Compensation Caps & Stacking

1. **Global Monthly Cap:** No automated retention package may exceed **£150.00** in total value per driver, per calendar month.
2. **Credit Stacking:** A driver may not receive more than **two (2) immediate credits** within the same 24-hour window. If a third issue occurs, the system must escalate to a human City Manager.
3. **Tier Multipliers:** Goodwill credits (Category: Churn) are strictly reserved for Gold and Silver tiers only.

Section B: Specific Issue Resolutions

1. **Airport Short Fares (SFP):** * Applicable only if wait time >90 mins and trip distance <3km.
 - **GOLD TIER CAP:** £25.00 maximum per instance. (Note: The AI must NOT use **INC-002** (£50) for standard short-fare recovery; that is reserved for multi-day systemic failures).
 - **SILVER/BRONZE CAP:** £15.00 maximum per instance.
2. **Technical & GPS Glitches:** * Maximum compensation is £10.00 per confirmed glitch (**INC-003**).
 - Priority Support Access (**INC-004**) should be offered for recurring geofence issues (>2 tickets in 7 days).
3. **New Starters (Tenure <3 Months):**
 - Priority should be given to **Commission Shields** (**INC-006**) rather than direct credits to encourage continued app usage.
4. **Infeasible Quests:**
 - If a driver completes >80% of a Quest but fails due to documented low demand (diagnostics confirm <1.5 offers/hour), a **Goodwill Gesture** of £20.00 is permitted.
